Designed for **separating different-sized materials on the work site**, Simex VSE screening buckets are unique for their **easy loading, very simple operation and high productivity**.

The exclusive Simex patent allows **rapid adjustment of output size** of the screened material in only seconds via a control in the operator cabin.

(1) The maximum operating load permitted for the excavator, when added to the weight of the standard bucket, must match or exceed the weight of the bucket at full load.
(2) User is responsible for ensuring that the equipment meets the excavator's specifications and weight requirements.
(3) Without mounting bracket.

Simex does not accept responsibility or liability for the information provided. Technical modifications may vary without prior notice.

HIGH INCREASE IN PRODUCTIVITY

Shafts are composed of elements with varying-sized disks that produce an intense **whirling of the material to be screened.**

SIMEX PATENT

Quick adjustment of output size.

Thanks to a simple control from the operator **cabin**, the Simex-patented mechanism allows shafts to be distanced or closed via a hydraulic system to **vary output size of screened material in only seconds.** Alternatively, the adjustment can be made by a remote control (*optional*).

MINIMUM/MAXIMUM

HIGH PRODUCTIVITY

Even when working with wet soil

EASY LOADING

Wide mouth shaped as standard bucket

SCREENING TOOLS ARE EASILY REPLACEABLE

Screening elements have different profiles to work with various materials. **Tool replacement is rapid and requires no disassembly of shafts.**
